

Yearly Status Report - 2018-2019

Part A			
Data of the Institution			
1. Name of the Institution	DON BOSCO INSTITUTE OF TECHNOLOGY		
Name of the head of the Institution	Prasanna Nambiar		
Designation	Principal		
Does the Institution function from own campus	Yes		
Phone no/Alternate Phone no.	02268878700		
Mobile no.	9820080079		
Registered Email	dbit@dbit.in		
Alternate Email	principal.dbit@dbclmumbai.org		
Address	Premier Automobiles Road, Kurla (West)		
City/Town	Mumbai		
State/UT	Maharashtra		
Pincode	400070		

Affiliated / Constituent	Affiliated
Type of Institution	Co-education
Location	Urban
Financial Status	private
Name of the IQAC co-ordinator/Director	Dr Sudhakar S Mande
Phone no/Alternate Phone no.	02268878735
Mobile no.	9867285270
Registered Email	iqac.dbit@dbclmumbai.org
Alternate Email	sudhakar.dbit@dbclmumbai.org
3. Website Address	

Web-link of the AQAR: (Previous Academic Year)	<u>https://www.dbit.in/images/Admin/NAA</u> <u>C_SSR_MHCOGN101498.pdf</u>
4. Whether Academic Calendar prepared during the year	Yes
if yes,whether it is uploaded in the institutional website: Weblink :	https://www.dbit.in/images/Acad/AC_Odd 18_19.pdf

5. Accrediation Details

Cycle	Grade	CGPA	Year of	Vali	dity
			Accrediation	Period From	Period To

10. Number of IQAC meetings held during the year :	2
The minutes of IQAC meeting and compliances to the decisions have been uploaded on the institutional website	Yes
Upload the minutes of meeting and action taken report	<u>View File</u>
11. Whether IQAC received funding from any of the funding agency to support its activities during the year?	No

12. Significant contributions made by IQAC during the current year(maximum five bullets)

Process of Academic Audit is regularly carried out to improve planning, execution and evaluation of academic processes.

Process of Examination Audit has been initiated with the objective to improve the evaluation process.

Training has been provided to selected faculty for preparing them for conducting internal audit as per the requirements of the ISO 9001:2015

No Files Uploaded !!!

I4. Whether AQAR was placed before statutory body ?	Yes	
Name of Statutory Body	Meeting Date	
College Development Committee	25-Feb-2020	

15. Whether NAAC/or any other accredited body(s) visited IQAC or interacted with it to assess the functioning ?	Yes
Date of Visit	14-Nov-2019
16. Whether institutional data submitted to AISHE:	Yes
Year of Submission	2018
Date of Submission	19-Dec-2018
17. Does the Institution have Management Information System ?	Yes
If yes, give a brief descripiton and a list of modules currently operational (maximum 500 words)	The institute has a fully functional Management Information System (MIS) which provides the following features: 1. The HOD and class teachers have the right to assign the students to create practical batches 2. This system captures the lecture/lab/ tutorial attendance of the students and providing a report regarding the same. The irregular student list is generated. 3. The staff biometric attendance module is interfaced with this system and it provides a monthly report. 4. The staff leave module allows the staff to apply for various

leaves and get them sanctioned. 5. The teaching , lesson and practical plan module allows the teachers to prepare their course plans. 6. It also provides a facility to enter the student marks of the internal assessment test. 7.MIS facilitates to collect teachers feedback from students.

Part B

CRITERION I – CURRICULAR ASPECTS

1.1 – Curriculum Planning and Implementation

1.1.1 – Institution has the mechanism for well planned curriculum delivery and documentation. Explain in 500 words

The curriculum planning process starts with allocation of course(s) to faculty based on the faculty's choice of subjects. Each faculty member plans his /her curriculum delivery by preparing Teaching plan, Lesson plan and the Practical plan at the beginning of the semester. Faculty prepares the course plan using various resources and identifies the gaps and accordingly plans the curricular and co-curricular activities. Faculty uploads the course material like Teaching Plan, Assessment Plan, Assignments, Lecture Notes, etc. on the Online Learning Platform 'Moodle' and on MIS for academic monitoring. Students can access the course material on their smart phones. Institute's academic calendar is prepared according to the notices and circulars received from the affiliating university and the students are notified the probable teaching days and dates of internal examinations, extension related activities and co-curricular activities. The time table committee designs the Time Table for all UG programs as per the university norms. The timetable is then displayed on the notice board as well as on the institute Website. Curriculum Delivery: Course outcomes for each course is shared with the students in the very first lecture. The pedagogy used for delivering the contents is indicated in the teaching plan. The faculty is expected to adhere to the Teaching Plan in all respects. Orientation program is organized every year for newly admitted students to make them aware of the mechanism for curriculum delivery and implementation. A prerequisite test is conducted to plan the course delivery for each course. Weak and bright students are identified at this stage and remedial or refresher sessions are conducted to bring the weak students on par with the rest of the class. The Internal Assessment (IA) - 1 tests are used to further identify weak and bright students. Remedial sessions are conducted for weak students and challenging assignments are given to brighter students. Apart from traditional chalk and blackboard method various other teaching methods like power -point presentation, ICT-enabled teaching-learning method, quiz, group discussion, debates, field projects, industrial visit, assignments, videos and taking examples of case studies for effective curriculum implementation are used in the classrooms. Expert lectures/talks on allied subjects are conducted to create a harmony between industry, curriculum and the students. The faculties design Certificate, Skill based and Value added courses focusing on employability enhancement and entrepreneurship development for the students. Documentation: The following documents are maintained for curriculum delivery and monitoring: 1. Teaching and lesson plan including laboratory plan 2. Lecture notes available online 3. Gap identification process and design of cocurricular activities to fill the gaps 4. Mapping of CO and PO and calculation of CO attainment 5. Feedback from all stakeholders on curriculum, classroom teaching as well as co-curricular activities 6. Academic monitoring activities like attendance monitoring of students & counseling of students with poor

attendance, mentoring of students, course delivery monitoring, audit of course material and Laboratory are conducted.

1.1.2 – Certificate/	Diploma Courses int	troduced during the	academic year

1.4.1 – Whether structured feedback r	eceived from all the	stakeholders.		
Students			Yes	
Teachers			Yes	
Employers			Yes	
Alumni		Yes		

1.4.2 – How the feedback obtained is being analyzed and utilized for overall development of the institution? (maximum 500 words)

Yes

Feedback Obtained

Parents

The institute has been able to set up a robust feedback system by which feedback is gathered from all stakeholders which includes students, parents, teachers, alumni and employers. The different feedback obtained are as follows: 1. Curriculum feedback from all stake holders (industry, alumni, parents) taken during the academic term. 2. Feedback on the teaching-learning process is received from students (twice in a semester), parents (once in a semester) and prospective employers (once a year). 3. Feedback on the campus facilities like canteen, library, ICT facilities, campus hygiene, etc.from students ,faculty, parents and recruiters once in a year 4. Feedback on co-curricular activities is taken from students at the end of the event Structured questionnaire is available for the same. Some feedback is taken online while some are collected manually. The received feedback is analyzed on a scale of 1 to 5 and forwarded to the Head of the institution with necessary suggestions. Based on this feedback, necessary action plan is made by each department and implemented in the upcoming semester. Departments receive feedback from parents through parent teacher meetings and discuss different issues related to the overall development of their ward. The feedback form for parents and students is distributed in the classroom and also made available on the DBIT website (https://www.dbit.in/index.php/feedback). The Alumni feedback is taken during alumni meet along with online submission. The feedback is then consolidated by

the coordinator and suggestion are given to the respective Head of Department. Analysis of the feedback is done to improve the teaching learning process and keep pace with the changing trends in society, industry and academia. The student's feedback is taken for all the theory and practical courses taught to them in each semester on the syllabus and its adequacy, teaching methodologies adopted by the teachers, teachers approach-ability and response towards students, teachers ability to teach a subject and control the class, about syllabus coverage, about the organization of lectures, use of modern tools of pedagogy etc. The feedback from the parents helps the Institute immensely in reorienting the administration, the skill development, appropriateness of the courses for career growth of their ward, overall progress of their ward etc. The Feedback from Alumni is sought (after graduation) about the role played by the institute for the progress of students in their career, about the impact of training provided by the college, the enhancement in their maturity level , refinement in their technical, decision-making and presentation skills at the workplace. The Employers feedback underlines the assessment parameters of the student in the form of subject knowledge, attitude, behavior, maturity, motivation, creativity, presentation skills and ability to get along with others. The analysis of this feedback helps the institute in reviewing the various certificate courses, value added courses and skill development training. The feedback on campus facilities is taken very seriously and forwarded to the Management for improvements.

CRITERION II – TEACHING- LEARNING AND EVALUATION

2.1 – Student Enrolment and Profile

2.5.2 – Reforms initiated on Continuous Internal Evaluation(CIE) system at the institutional level (250 words)

The institution has adopted the Outcome Based Education system. Course outcomes are framed at different levels of Blooms Taxonomy. Continuous efforts are put in to ensure that the question papers for the Internal Assessments map to the course outcomes designed for the subjects. For attaining higher level outcomes the students are made to participate in activities like Project Based Learning, Seminars, Case studies, etc and they are assessed accordingly against clearly defined rubrics. The Internal Assessments are carried out at the Institute level similar to the end semester examinations for ensuring that there is uniformity across departments in the conduct of the examination. To ensure transparency in assessment, the assessed answer books are shown to the students. Average of two internal tests is considered for the internal assessments. The marks are uploaded on MIS and made available to students and their parents. The answer books and the solutions undergo an audit by auditors nominated by the Head of Dept. The institute has constituted an Examination Committee consisting of the Controller of Examinations, and one faculty nominated from each department. This committee looks into any grievance related issues and is an interface between the exam department and the other departments in the institute. In some cases, faculty members conduct online exams using Moodle Learning Management Software. Faculty members also give assignments to the students to augment the prescribed syllabus. Activities lke industry visits and expert lectures are conducted to provide content beyond syllabus. The assignments are accounted as part of the term work to be carried out by every student. Term work marks are allocated based on continuous performance in the internal assessments and any other task assigned.

2.5.3 – Academic calendar prepared and adhered for conduct of Examination and other related matters (250 words)

The Academic Calendar is prepared at the start of each semester to ensure smooth conduct of academic, co-curricular and extra-curricular activities during the semester. The calendar is useful in planning events and fulfiling academic requirements, student feedback, remedial sessions, etc. The calendar is circulated among the students, teaching and the non-teaching faculty and also uploaded on the website. The Academic Calendar is prepared by the Principal and the HODs by mapping the important activities to be conducted during the semester to the number of instructional days actually available in the semester. An effort is made to balance the academic and co-curricular activities without disturbing the conduct of classes. Once the institute level Academic Calendar is finalised the departments prepare their departmental calendars. Departmental calendars map the various student chapter events and department specific activities.Overlap of activities is avoided as far as possible. Strict adherence to the calendar is enforced.

2.6 – Student Performance and Learning Outcomes

2.6.1 – Program outcomes, program specific outcomes and course outcomes for all programs offered by the institution are stated and displayed in website of the institution (to provide the weblink)

https://www.dbit.in/index.php?option=com_content&view=article&id=117&catid=2

hygiene in the canteen and monitors the food quality. 3.Library committee addresses specific needs of the students and staff related to availability of books, accessing of journal articles, utilization of plagiarism software, etc. 4. The sports committee along with the Sports-in-Charge ensure the availability of sports equipment and monitor the usage of the ground, courts and indoor games facilities. The Sports-in-charge maintains an inventory of the sports equipment. An attendant is provided during the lunch break and after college till 6 pm. 5. The laboratory assistant along with the laboratory in-charge handles the laboratory equipment and maintains the Dead Stock Register (DSR) and the routine maintenance of the equipment. 6. Any breakdown maintenance is taken care of by the Dean Administration / Administrator in consultation with Management 7. Class teachers are responsible for addressing day to day requirements and monitoring the upkeep of the facilities in the classroom. 8. The exam section along with the exam committee ensures that all processes for assessment and evaluation are meticulously followed.

skills and career through interactive programs with the faculty, organizational and society. The goal of the student council is to provide a common platform to students for co-curricular and extra-curricular activities. It is responsible for all the major technical, cultural, literary and sports activities organized in the college premises. Activities under the council will be well supported by a team of faculty members. Each year the student class representatives elect the following members (one boy and one girl student) to the student council: 1. General Secretary 2. Technical secretary 3. Treasurer 4. Cultural Secretary 5. Sports Secretary 6. Public Relation 7. Alumni Secretary Since AY 2018 - 2019 the post of Public Relation and Sustainability Secretary were discontinued and two new posts Alumni Coordinator and Marketing Secretary were introduced. Student representatives are an integral part of the following committees: • Anti-ragging • IQAC • CDC • Training and Placement • SC/ST/OBC • Women's Development Cell • Minorities Cell • Canteen • Website Development and maintenance • Disciplinary • Internal Exams • Housekeeping and Maintenance • Library The student secretaries are groomed various leadership and outreach program. They prepare the annual activity calendar and propose the annual student activity budget which is sanctioned by the Principal. They submit a formal report and the expenditure statement for each event.

5.4 – Alumni Engagement

5.4.1 - Whether the institution has registered Alumni Association?

Yes

5.4.2 - No. of enrolled Alumni:

718

5.4.3 - Alumni contribution during the year (in Rupees) :

33700

5.4.4 – Meetings/activities organized by Alumni Association :

Alumni Konnect 2019 Synchrony Meet 2019

CRITERION VI – GOVERNANCE, LEADERSHIP AND MANAGEMENT

6.1 – Institutional Vision and Leadership

6.1.1 – Mention two practices of decentralization and participative management during the last year (maximum 500 words)

• The institute appoints Deans (Academic, Research and Administration) and Heads of Departments to manage the day to day operations. The appointments are for a period of 3 years thereby providing all senior faculty an opportunity to handle the responsibility. • Deans and HODs have the autonomy to manage their domains as effectuively as possible within the guidelines provided by the management. The Principal meets with the Deans and HODs every week to plan , monitor and assess the impact of the various activities on campus. • The institute has a functional CDC (College Development Committee) comprising of management representatives and elected representatives of the teaching and nonteaching staff. The CDC gives important inputs that are taken up by the management for implementation. • The IQAC meets atleast twice a year to propose quality improvement initiatives and take stock of practices already adopted by the institute. Student representatives are also part of the IQAC. • The various committees at the institutional level meet regularly to assess the campus requirements and propose measures to improve the environment on campus. CASE STUDY 1 Decentralization and participative management is evident in the process of preparation and sanction of the Annual Budget which is elaborated below: • Before the end of the financial year each HOD submits to the Principal the budgetary requirements of her department for the following academic year. • The HOD gathers the necessary requirements for equipment, consumables, training of

faculty and students, purchase of books, from her departmental colleagues. • The Principal consolidates all the requirements under various budget heads and presents the consolidated budget before the CDC for their approval. • After approval from the CDC the budget is presented before the Board of Governors for approval. • For any expenditure beyond the budgetary provisions, the HOD makes a special request to the Management through the Principal. The request is forwarded by the Principal after assessing the need for the expenditure. • The Accounts Manager monitors the expenditure and informs the Principal of any spending in excess of the budget. CASE STUDY 2: Every department is given freedom to operate independently while being goverened by the guidelines issued by the management. The department is authorized to take decisions like organizing of guest lectures to make students aware of the cutting - edge technology in their respective domain, budgetary provision, etc. The department is also free to plan and execute the curricular, extra curricular and cocurricular activities that are necessary to foster student's skill set to make them employable in reputed organizations. For. e.g. The Game of Codes , a coding competition is organized by department of Information Technology, to develope problem solving skills through the use of programming language. The event planning , execution and management is carried out by the team of the students and the teacher.

6.1.2 – Does the institution have a Management Information System (MIS)?

6.2 – Strategy Development and Deployment

6.2.1 – Quality improvement strategies adopted by the institution for each of the following (with in 100 words each):

Yes

Strategy Type	Details
Curriculum Development	The curriculum is provided by the Mumbai University. The faculty attend the orientation programs conducted by the subject experts before the commencement of the new curriculum. Guest lectures, workshops and competitions are arranged by the faculty to support the curriculum.
Teaching and Learning	 Semester Pre-commencement Preparations- 2. Teaching , Lesson and Practical plans are created by the faculty 3. Course learning Objectives and Course Outcomes 4. Course notes and presentations are uploaded on Moodle 5. Updating the library with appropriate books as suggested by the faculty 6. Monitoring students performance through Internal Assessment Test-I and II , assignments and projects. 7. Student feedback and peer review is collected with regards to the teaching . 8. Result analysis at the end of internal assessment test 9. Remedial classes for slow learners. 10. Inputs from IQAC, Department Academic advisory committee, Parent-Teacher association and various feedback mechanisms is considered for improvising the teaching-learning.
Examination and Evaluation	1. The students have to submit the

	term work of 25 marks at the end of the semester in which their performance in the laboratory is evaluated 2. Two internal assessment tests of 20 marks each are conducted during the semester to evaluate the performance in the lectures 3. Oral/Practical examination is conducted at the end of the semester as prescribed by the university curriculum 4. The student has to appear for end semester exam of 3 hour duration which is conducted by the university
Research and Development	 Publishing of DBIT TECH Journal 2. Appointment of Dean R and D, External Mentors to mentor faculty for research. Since 2014, faculty have been submitting proposals to the Mumbai University under the Minor Research Scheme. This year 3.1 lacs worth minor research are carried out by the faculty Each department has formed research groups of faculty members and have set research goals and timelines for their activities. These are monitored by the Research committee and the Dean of R and D 5. Presently 2 projects worth approximately Rs. 2 lacs have been sponsored by the management and work is underway 6. An MoU has been signed with IICT. Hyderabad, which is a CSIR lab to set up a research laboratory in DBIT and undertake joint research in water testing and water purification 7. MoUs have also been signed with 2 universities in Taiwan for collaborative work and faculty/ student exchange 8. More MoUs are envisaged in sensor technology, micro machining, GIS studies, etc.
Library, ICT and Physical Infrastructure / Instrumentation	 The Library committee gives guidelines for improving the quality of library resource. Suggestions from student's for Library and IQAC suggestions are used for improvement in quality of library resource. 2. New books/journals /software are purchased every year to update the library. 3. Presently, Library Circulation is fully automated. 4. The ICT facilities are provided in every class room for effective teaching learning 5. The institute has well equipped labs as per the AICTE requirement 6. New software and hardware is purchased once sanctioned in the respective budget of each department

Human Resource Management	 The faculty recruitment happens as per the norms provided by the university 2. Skill development programs are organized for the staff 3. Staff is encouraged for self development and qualification enhancement 4. Various Staff welfare schemes are presently employed 5. At the end of every year, performance evaluation of the staff is carried out. This is used for deciding promotions and increments. Self appraisal evaluation is done by the faculty and reports are submitted to the Principal Inclusion of industry experts in
Industry Interaction / Collaboration	Academic Advisory Board (AAB). 2. Students and faculties are encouraged to go for internships in the industry 3. In view of sharing technical resources and expertise, MOUs are signed with reputed companies 4. Alumni placed in the reputed industries are invited for informal dialogue with the students. Entrepreneurship training workshops are organized for the students and the faculties
Admission of Students	1. Eligibility criteria as prescribed by the Government of Maharashtra and given in the Admission Rules. 2. Every student seeking admission to the First Year of Engineering should register themselves with the Centralized Admission Process (CAP) conducted by DTE, Maharashtra State at the DTE facilitation Centers (FC). This Process is prerequisite and mandatory also for Minority students seeking admission for Minority Category. 3. 49 percent seats are filled through CAP conducted by DTE. 51 percent seats are reserved for Minority candidates (Roman Catholic Community).
6.2.2 – Implementation of e-governance in areas of oper	
E-governace area	Details

E-governace area	Details				
Planning and Development	In house Management Information System is used to plan implementation of course curriculumThe in-charge for the same is an in house team.				
Administration	In house Management Information System is used to plan implementation of , attendance of students and faculty.The in-charge for the same is an in house team.				
Finance and Accounts	We are having Tally ERP 9.0 for				

	managing the accounts, payroll and finance
Student Admission and Support	Most of the admissions are centrally managed by the DTE through their central admission process.The management seats are managed internally.
Examination	We are using internally developed software for result gazette generation and marksheet preparation which is called NEST and is managed by our internal team

6.3 – Faculty Empowerment Strategies

6.3.1 – Teachers provided with financial support to attend conferences / workshops and towards membership fee of professional bodies during the year

6.4 - Financial Management and Resource Mobilization 6.4.1 - Institution conducts internal and external financial audits regularly (with in 100 words each) Institution conducts internal and external financial audits regularly The institute is a self financed private institute . Its main source of income is the tuition fee collected from the students. The Fee Regulatory Authority, Shikshan Shulka Samiti, decides the fee on the basis of the expenditure incurred by the institute. The institute has to submit the audited statement of accounts as evidence . Hence extreme diligence is maintained in preparing the income and expenditure statement. The final statement of accounts is audited by an external auditor each year. Some of the good accounting practices followed are: • Efficient and qualified accounts team with an Accounts Manager • All salaries are directly credited to the individual accounts through net banking • Net banking is used for making purchases and also for transferring money for workshops, conferences, trainings, etc. • Issuance of proper receipt against any income There is no formal process of internal audit however adequate checks and balances are put in place to ensure financial accountability. These are given below: 1. Individual departments submit a budget for the expenditure to be incurred under the following heads: • Infrastructure • Books and periodicals • Maintenance • Consumables • Equipment and hardware • Software • Training, conferences, expert faculty • Students activities 2. The Principal presents the consolidated income and expenditure budget before the CDC and then before the Governing Board for approval. 3. The budget for the infrastructure and campus maintenance is prepared by the Administrator in consultation with the Accounts Manager 4. All expenses are to be approved by the Dean of Administration 5. Expenditure under the various heads is monitored regularly by the Accounts Manager and any unplanned expense is discouraged 6. The purchases policy of the ins								

followed. 8. Any income generated through training, consultancy, projects is properly accounted.

7.1.2 – Environmental Consciousness and Sustainability/Alternate Energy initiatives such as:

Percentage of power requirement of the University met by the renewable energy sources

The Vision statement of the institute promotes research in the field of sustainable technologies. The institute has framed a Green Policy to promote sustainable alternatives in everyday life. The institute has a lush green campus which is regularly maintained and provided with organic manure produced from the compost pit which is maintained on the campus by a dedicated team. The institute continues to put in great efforts to bring about awareness about sustainable development and encourages students and staff to take up projects within and outside of the campus for the same. A bio-gas plant is run using the canteen food waste. The set up is also used to conduct experiments in the subject of Renewable Energy Sources taught to final year students of Mechanical Engineering. Student teams are working on a project to reduce the power consumption of the sanitary pad incinerator installed in ladies washrooms. A five gas analyzer is purchased by the institute that detects the gases such as HC , CO2 , CO, O2 and NO and is being used to monitor the exhaust from the incinerator and for research by the faculty and students to design environment friendly products. Students are encouraged to maintain a kitchen garden where herbs and vegetables are grown and sold at nominal rates to the staff and students. The department of Basic Sciences and Humanities organizes a sustainability competition each year for the students of the first year to develop innovative and sustainable solutions for societal problems. Each department has a mandate of ensuring that at least 20 of the final year projects undertaken are based on environment and sustainability. The compost from the compost pit is sold at a nominal rate to students and faculty at DBIT to encourage them to manage their household waste and grow household plants. The Institute has a 100kW Grid Tie Solar PV power plant as a renewable energy resource which has an annual production of approximately 125,425 kWh (1,450 kWh/kWp) because of which about 87.8 tons of CO2 emission is annually avoided. For the year 2018-19, the total annual power requirement was 773417 Kwh and the annual power requirement met by renewable energy sources is 87482.4 kWh. Hence the percentage power requirement met by renewable energy resources was 11 percent.

7.1.5 – Human Values and Professiona	I Ethics Code of conduct (handb	books) for various stakeholders
Title	Date of publication	Follow up(max 100 words)
Service Book	02/01/2018	The institution has framed the Service Rules according to the AICTE, UGC and UoM norms. For recruitment, the HoDs reviews faculty requirements as per teaching load and submits the consolidated staff requirement to Principal after which the recruitment takes place according to the norms of the University of Mumbai, AICTE and rules applicable for institute with minority status. All newly inducted faculty read through the contents of the service book. There is a process to amend the contents based on change in policy, eg. leave rules, rules for Phd sponsorship, etc.
Student Guidelines	02/01/2018	DBIT requires all students to act as responsible citizens and members of a higher education academic community.Each student is responsible to know,abide by,and adhere to the Institutes Code of Conduct, policies, rules, and regulations. A safe, caring and orderly college campus is the foundation for a successful learning environment. The Code of Conduct supports socially responsible behavior and allows the students to be fully informed about the expectations of the Institute.This handbook is available on the Institute website. All the students are expected to read this after taking admission to familiarize

7.1.6 – Activities conducted for	promotion of universal Valu	ies and Ethics						
Activity	Duration From	Duration To	Number of participants					
International Yoga day	21/06/2018	21/06/2018	350					
Workshop on green campus	16/07/2018	16/07/2018	52					
Attitude and Don Bosco Way	21/08/2018	21/08/2018	200					
Disaster Management for students and staff	05/08/2018	05/08/2018	124					
Voters Awareness rally	25/08/2018	25/08/2018	72					
Road Safety and Traffic Control	23/09/2018	23/09/2018	10

7.1.7 – Initiatives taken by the institution to make the campus eco-friendly (at least five)

Attitude Building A talk on Green campus initiative was conducted for students. Some of the other activities conducted included Zero litter, Waste management, Water Management, Energy Efficiency, Sustainable travel, Avoid plastic pollution, Beach cleanup drive. The Green line group of the NSS is working on several projects which are related to environment conservation. Students have also prepared banners which describe the best practices of water management and electricity management which are displayed along the corridors and in classrooms, laboratories and washrooms of the institute.

Green Campus The institute has a green campus with 180 trees and plants which is regularly maintained and provided with organic manure produced from the compost pit on the campus by a dedicated team. For the institutional level programmes the guests are greeted with plant saplings and welcome kit of paper/jute bags. A number of office activities are paperless through the DBIT-LAN portal to reduce the use of papers. At least 11 of the institute's energy requirement is supplied through solar panels

Waste recycling: Food waste from the canteen is fed to a biogas unit. The unit is used as an experimental set up for the subject of Renewable Energy Sources. A composting unit converts all organic waste on campus into manure that is fed to the plants within the campus. Recycling of electronic waste is carried out.

Use of ICT: Paper usage is reduced through online submission of assignments. Online feedback is used instead of paper feedback to capture stakeholder satisfaction. Online learning Management system is used to provide study

material to students.

Projects/Competitions: The institute encourages students and staff to take up projects in the field of sustainable development within and out of the campus. Around 16 of the projects carried out by students of the final year of engineering are on sustainable development. Three projects based on nonconventional energy have been funded under Mumbai University minor research grant schemes. Competition and exhibition is organized for the first year students in order to inculcate responsibility and commitment towards the environment at the very outset of the engineering program.

Purchase of Equipment -A five gas analyzer is purchased by the institute that detects the gases such as HC , CO2 , CO , O2 and NO is used for research by the staff and students to build environment friendly products. Testing and optimizing the performance of the engines designed by students while participating in n different vehicle building competitions and incinerator for disposal of sanitary napkins are some of the research areas the gas analyser is being used. Energy efficiency rating is a prime criteria for purchase of air conditioners, fans and lights on campus

7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Practice - 1 Title of the Practice : Training students to deploy technology for community development. Objectives of the Practice: The objectives of this practice are as follows: • Sensitise the students to the hardships faced by local communities around Don Boaco institutions • Create an awareness amongst the students about the culture and the customs of the communities • Learn to engage with the communities and identify their problems • Select some of the problems for a detailed study and use technology, creativity and innovation to solve the problem partially of fully. The Context: The villages of Jawhar taluka, situated 140 Km North of Mumbai are tribal villages with poor literacy and health records. Farming is the main occupation but post monsoon the villagers migrate since there is no water available to sow another crop. The village women trek several kilometres each day to bring water and firewood. The students were given information about the watershed activities in the area by the Bosco Samajik Vikas Sanstha social workers and were encouraged to take up projects to improve the lives of the people. The practice: As part of the social outreach of DBIT the students are taken to a tribal village situated 140Km North of Mumbai and made to interact with the tribal villagers. The students study the problems of the villagers and to use technology to bring about positive changes in their lives. The camps are usually held in the months of December and January. 2 weeks prior to the camp the students are briefed on the culture and practices adopted by the villagers. Students teams are formed to engage with the villagers in the following areas: 1. Primary school education 2. Water management 3. Communication skills for young students in Jawhar college 4. Health and hygiene 5. Livelihood options The student teams meet with the villagers and prepare a list of activities to be undertaken. They create and action plan and conduct the activities with the participation of the villagers. A review meeting is held every evening to review the impact of the

activities of that day and plan the course of action for the following day The students also spend 24 hours with a tribal family to learn about their culture and traditions and understand their issues. Evidence of success: 1. Building a bond with tribal students in colleges through student exchange programme

conducted every year 2. Greater awareness on menstrual hygiene and use of healthy practices to manage menstruation. Dispelling myths on menstruation. 3. Village plan for equitable water distribution in village and GIS survey of water bodies in the villages under consideration and preparation of watershed

plan 4. Better communication ability of school children and college 5. Projects taken up by students on health management, water management, design of solar

cookers for the community, design of efficient chulhas for the villagers Problems encountered and resources required: 1. The villagers have deep mistrust for outsiders and are not willing to share data 2. Villagers are dependent on external help and not willing to strive for a better life 3. There are too many myths and superstitions to be taken care of 4. A longer time period of interaction is required to bring in a positive change 5. The villages are too far away for regular interactions Resources required: 1. Travel grants 2. Social workers who are better informed of the customs and practices of the villagers and can help our student teams to interact with the villagers 3. Monetary help for bringing in small changes Practice - 2 Title of the Practice : Faculty Appraisal as a tool for departmental and institutional development and reward and recognition Objectives of the Practice: The goals of the practice are as follows: • Assess the contribution of each faculty • Grade the faculty as average, below average and above average performers • Assess departmental and institutional strengths and weaknesses • Provide a road map for faculty to set career goals and move to a higher performance level • Identify faculty who have made unique contributions and reward them • Benchmark institutional performance against that of better known institutions • Align faculty performance towards the Vision and Mission of the institute • Ensure compliance with the various criteria of NAAC and NBA • Raise the bar for minimum performance The Context: Each year the faculty undergoes a performance appraisal by a team of senior faculty including Advisor, Principal and HODs. The purpose of the appraisal is to help faculty understand their shortcomings and set higher performance goals. To achieve this objective the institute has designed a self -appraisal document that captures the faculty's contribution to academics, research, industry interaction and personal development. The self appraisal format helps the faculty rate their performance for each criteria and reduces the stress of appearing before a committee and being judged. The practice: The appraisal format is provided online to every faculty. The document has five main criteria and several sub-criteria as performance indicators. Each sub-criteria has four options which are arranged in increasing order of progress. Minimum performance criteria is shared with the faculty when they join the institution. In addition to regular teaching-learning faculty are expected to do the following: • Engage in research on campus • Engage with industry to identify their needs , carry out projects, conduct training • Upgrade skills and knowledge through certification, internship, etc. • Mentor students • Participate in outreach programmes for community • It is essential to measure the extent to which faculty is able to comply with these requirements and to reward those who are willing to walk the extra mile The Faculty chooses the option that best describes her work for the academic year. Faculty is advised to upload evidence to substantiate the option selected. The document is forwarded to the HOD who verifies the evidence and approves the option selected after a detailed discussion. A committee comprising of the Advisor, Principal and HOD scrutinise the information provided by faculty and do a random verification with a few faculty. The appraisal team summarises the contribution of all faculty and submits a report to the management faculty performance The Principal analyses the data to determine the strengths and weaknesses of each department. The same is shared with the department faculty. The committee mentors and counsels the department on performance improvement and on setting goals for the following academic year. to enable them to set targets for the following year to improve their performance. Individual faculty members are also mentored to set personal goals to improve their performance. Evidence of success: 1. The faculty is aware of her drawbacks and sets goals for improvement. 2. The department becomes aware of its strengths and weakness. 3. Above average performers are recognised and motivated to do even better 4. The management understands the extent to which its VISION and MISSION is being satisfied and identifies institutional strengths and weaknesses. 5. The management sets institute level goals and brings in practices to improve

institute performance. 6. With each year there is an increase in the minimum performance level of the department 7. Institutional objectives are being met organically Problems encountered and resources required: 1. Since the tool is based on self appraisal, faculty tend to overstate or sometimes understate their achievements 2. The tool has to be calibrated to ensure uniformity in self-assessment 3. Faculty has to be trained to upload the right evidence No additional resources are required

Upload details of two best practices successfully implemented by the institution as per NAAC format in your institution website, provide the link

https://www.dbit.in/images/Admin/Best-Practices.pdf

7.3 – Institutional Distinctiveness

7.3.1 – Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust in not more than 500 words

The Vision statement of DBIT mentions research as a core aspect of growth and development of the institute. The institute aims to become a centre for research and development in the field sustainable technologies and train engineers to excel in industry, research and entrepreneurship. The institute encourages research culture among the faculty and students. It guides faculty to apply for Major and Minor Research Projects to the University of Mumbai, DRDO, IEEE etc. Grants ranging from 50,000/- to 2,50,00/- are sanctioned by the Management for conduct of in-house research to faculty who propose good research projects. Such proposals are scrutinised by an expert team before grant is sanctioned In the year 2018-19, total grants received for research was around 5.6 Lakh rupees. The institute has well defined Code of Ethics to guide students faculties toward the highest ideals of scholarly research. Adjunct faculty and Mentors are appointed to help faculty define good research projects and carry out original work. Faculties have actively participated in national and International conferences organized at national and international level and presented papers in reputed journals. In the year 2018-19, a total of 54 papers were published of which 19 were journal publications. The Institute has good collaboration with industries, academic institutes and professional bodies. Institute has signed MOUs with academia as well as industries. Several students completed internship training in various companies. Institute has more than 300 linkages with different organizations in order to execute internship, final year projects and faculty and student exchange. In the year 2018-19, five new MoUs were signed by the institute to foster institute-industry interaction and to bring joint research collaboration, among other things. DBIT has leveraged its social commitment by engaging with the under privileged communities around the institute's premises as well as in other areas where there is a Salesian presence like the tribal communities of Jawhar taluka in Palghar district. Students and staff work closely with these communities to understand their problems and develop technological solutions. Several of the final year projects of the students are oriented towards solving such problems. The institute also plans to set up a Centre for Sustainable Technologies to patent some of the solutions and help incubate them into successful businesses. DBIT strongly believes in nurturing entrepreneurship amongst its students and faculty and has created an ecosystem for this. Students are encouraged to work on ideas for their final year projects. Projects are exhibited in INNOVEX - the annual project exhibition and best projects are awarded. In order to encourage innovation on campus, an innovation centre is envisaged. Software that trains in idea generation and product development called INNOVATIONEXT has been purchased by the institute. Students of second year are formally trained in using the software to generate innovative ideas which they can explore in their third and final year. The institute has initiated a Value Added Course on Research and review for the third year students in order to promote research

Provide the weblink of the institution

8. Future Plans of Actions for Next Academic Year

Plan for AY - 2019 - 2020 : i) To improve quality of Course Outcome (CO). Experts Lecture (s) will be organized. Faculty to prepare CO as per Blooms Taxonomy (BT) for their respective courses and will be presented to the panel of experts. ii) To promote research culture and innovation among students To enhance the quality of research among under graduate students. Experts will create awareness about research in organized and systematic manner. iii) To promote faculty to strengthen industry - institute interaction through faculty internships. Faculty members will undergo minimum 15 days of industry internship in their domain of interest. iv) To promote entrepreneurship among faculty and student, training sessions are planned. To motivate students to take up entrepreneurship after completion of their program, they will be trained by professional, in various aspects of setting up a start-up. To motivate the faculty to take up research in the direction of product development. v) Faculty from various departments will be encouraged to register for their PhD. vi) Publications in journals will be improved. vii) Industry institute collaborative projects will be increased. viii) Incubation center will be established. ix) Center of Excellence in Automation and Robotics will be setup.
